

# Hive stand

Galvanized steel hive stand.

Creates a comfortable, versatile work bench.

For installation it requires two bi-pods and two wooden beams with dimensions of 40x60 mm. Each of the bi-pods has one adjustable leg which allows positioning of the entire stand on uneven terrain. When equipped with beams of sufficient length, the stand can accommodate up to 5 hives. This solution does not require many individual stands, it is stable, durable and minimizes the costs associated with the purchase of a separate stands.
